

SORBOAIR™

Lightweight and durable with neutral arch support that provides shock absorption yet does not alter or inhibit function of the foot.

Sorboair™ is the lightest weight 100% Sorbothane® insole available. A new air-infusion process enables IEM Medical to produce a light weight Sorbothane® insole with more cushioning and energy return, yet all the protection of traditional Sorbothane®.

See and feel the difference of IEM Medical Sorbothane® products. Through innovations in design and the application of the best materials available, IEM Medical is dedicated to quality insole development. Our package design allows easy access to the most complete line of insole products available.

New Lighter Weight, Shock Absorbing, Air-Infused 100% Sorbothane® Replacement Insoles. Perfect for all sports including:

- Walking
- Running
- Aerobics
- Racquet Sports
