

Sorbothane®

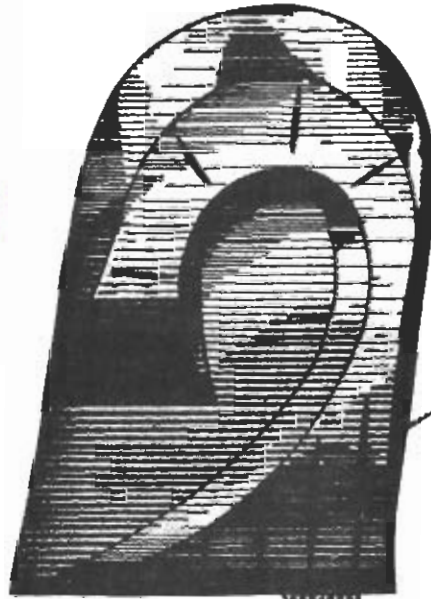

A VISCO ELASTIC POLYMER II

NEW! IMPROVED! ACCOMMODATIVE HEEL PAD

The Sorbothane Accommodative Heel Pad...made of Sorbothane...is one of the most scientifically advanced and efficient energy absorbing devices available. This heel pad is designed to reduce the pressure that is placed on the **center** of the heel when walking, running or standing. It provides redistribution of the weight away from the painful area, making an effective treatment for heel spurs, bruises, callosities and many other heel problems, as well as accommodating acute areas following injections or surgery. The Sorbothane Accommodative Heel Pad, unlike usual felt, foam or rubber pads, will not take a compression set.

Available in three shoe sizes:

Small	Mens	Ladies
Medium	4-5	6½-7½
Large	6-8	8-10½
	9-13	11-12

**ACCOMMODATES
HEEL PROBLEMS**

- **CLINICALLY DESIGNED FOR MAXIMUM COMFORT AND RELIEF.**
- **MADE OF SORBOTHANE WHICH CAN ABSORB UP TO 94% OF APPLIED ENERGY.**
- **OUTLASTS OTHER CONVENTIONAL HEEL PADS AND CUPS.**
